A MINI PROJECT REPORT ON

"COURIER MANAGEMENT SYSTEM"

Submitted in partial fulfillment of the requirements for

DBMS MINI PROJECT [18CSL57] IN

5th SEM COMPUTER SCIENCE AND ENGINEERING 2020-2021

Submitted by:

Adarsh N 1GG18CS002

Nithin Kumar B 1GG18CS028

Vinayak S B 1GG18CS043

UNDER THE GUIDANCE OF

Dr.SHABEEN TAJ G A

Associate Professor Dept. of CS&E GEC, Ramanagara.

DEPARTMENT OF COMPUTER SCIENCE
ENGINEERINGGOVERNMENT ENGINEERING COLLEGE
B.M. ROAD, RAMANAGARA-562 159

GOVERNMENT ENGINEERING COLLEGE

Ramanagara-562159

Department of Computer Science & Engineering

CERTIFICATE

Certified that the project entitled "COURIER MANAGEMENT SYSTEM" carried out by "Adarsh N, Nithin Kumar B, Vinayak S B" Submitted by the partial fulfillment of the requirements for the award of the degree of DATABASE MANAGEMENT SYSTEM LABORATORY [18CSL57] with Mini Project in 5th sem Computer Science and Engineering of Visveshwariah Technological University, Belagavi during the year 2020-2021. The Project report has approved as it satisfies the academic requirements in respect to the Mini Project Work prescribed for the Bachelor of Engineering Degree.

Dr. Shabeen Taj G A	Prof.VANITHA G
[Guide, Dept of CSE]	[HOD Dept of CSE]

ACKNOWLEDGEMENT

We consider it a privilege to whole-heartedly express my gratitude and respect to each and every one who guided and helped me in the successful completion of this Project Report.

We are very thankful to the principal **Dr. G.PUNDARIKA** for being kind enough to provide me an opportunity to work on a Project in this institution.

We are also thankful to **Prof. VANITHA G**, HOD, Department of Computer Science, for her co-operation and encouragement at all moments of my approach.

We would greatly mention the enthusiastic influence provided by

Dr. Shabeen Taj G A, Associate Professor, as our Project Guide, for her ideas and cooperation showed on us during my venture and making this Project a great success.

We would also like to thank my parents and well-wishers as well as my dear classmates for their guidance and their kind co-operation.

Finally, it is my pleasure and happiness to the friendly co-operation showed by all the staff members of Computer Science Department, GECR.

INTRODUCTION

In ancient history, messages were hand-delivered using a variety of methods, including runners, homing pigeons and riders on horseback. Before the introduction of mechanized courier services, foot messengers physically ran miles to their destinations. Xenophon attributed the first use of couriers to the Persian prince Cyrus the Younger. The Ancient Greek courier Pheidippides is said to have run 26 miles from Marathon to Athens to bring the news of the Greek victory over the Persians in 490 BCE. The long-distance race known as a marathon is named for this run.

Starting at the time of Augustus, the ancient Greeks and Romans made use of a class of horse and chariot-mounted couriers called *anabasii* to quickly bring messages and commands long distances. The word *anabasii* comes from the Greek $\alpha v \alpha \beta \alpha \sigma i \varsigma$ (adscensus, "mounting"). They were contemporary with the Greek *hemeredromi*, who carried their messages by foot.

Indian Courier Services like Indian Postal Service , Blue Dark, Palande Courier Service, TNT Express etc.,

Couriers are distinguished from ordinary mail services by features such as speed, security, tracking, signature, specialization and individualization of express services, and swift delivery times, which are optional for most everyday mail services. As a premium service, couriers are usually more expensive than standard mail services, and their use is normally limited to packages where one or more of these features are considered important enough to warrant the cost.

Courier services operate on all scales, from within specific towns or cities, to regional, national and global services. Large courier companies include DHL, Postaplus, DTDC, FedEx, EMS International, TNT, UPS, India Post, J&T Express and Aramex.

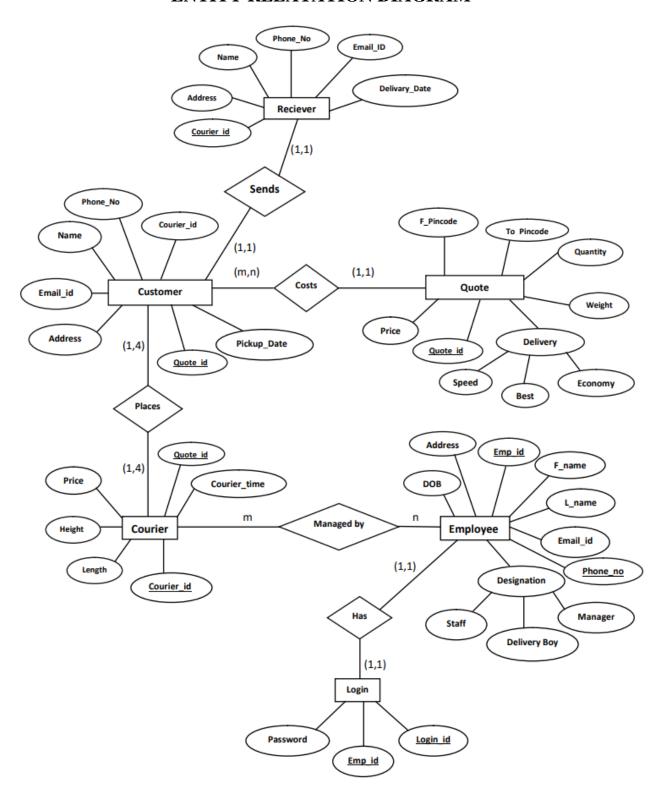

International courier services in India include DHL, FedEx, Blue Dart Express, E-kart, DTDC, VRL Courier Services, Delhivery, and Gati Ltd. Apart from these, several local couriers also operate across India. Almost all of these couriers can be tracked online. India Post is another major courier service with around 155 thousand branches (comprising 139 thousand (90%) in rural areas and 16 thousand (10%) in urban areas).

THE MOTIVE

The Eager to learn new things and interest in coding with the support of the teacher we thought of creating and making the courier service to the next level in the developing country like INDIA making it easier, faster and reliable to the public and offices. Due to the pandemic COVID-19 the transportation was severely damaged and the physical communication (like letter, parcel and courier) were affected though the Govt. of India declared postal service as an essential service, the public were in a fear to come out. This is a disaster in the history of mankind. To make things easier to send the courier we are out to fulfill the essential services of public.

In such a populated country physical communication is at most important for the companies especially Govt. offices must communicate through formal letters so we are making a platform so that each and everyone can afford and use our courier service.

CONCLUSION

Computer has got clear advantage over the manual system. The computerized system is more reliable, efficient and fast at the end of the project, | can say that computer play a very crucial role in the development of firm. All the daily reports generated by the system are to be checked by the concerned official so as to ensure that all the transactions have been put through in appropriate accounts and this is tallied with the new vouchers.

Computer does maximum work with in minimum time. Because it is used in every field so that it provides comfort and suitability to everyone. Providing maximum facilities and comfort to customers to customers is main goal of the firm. To achieve this goal, other modern facilities relating to computer should have to be provided.
